TA007 INTERACTIVE TABLE

Interactivity, ease and design, are three words that define our interactive tables, a multi-touch equipment that combines micro technology to the concept of design and usability. Thanks to its capacitive technology and screens from 32 to 100 inches long, our new multi-touch interactive solution with design, finishing and functionality are adjustable to the customers' specificities and requirements.

TECHNOLOGY

Multitouch – 10 touch points
LED Full Hd display
Plug & play
2 YEARS WARRANTY

STRUCTURE

Structure: lacquered steel in any RAL color.
Top frame: steel or glass painted in any RAL color. Table legs in Lacquered steel in any RAL color. The legs are removable and configurable with two heights: adults 90cm and kids 75cm
